Our Mission

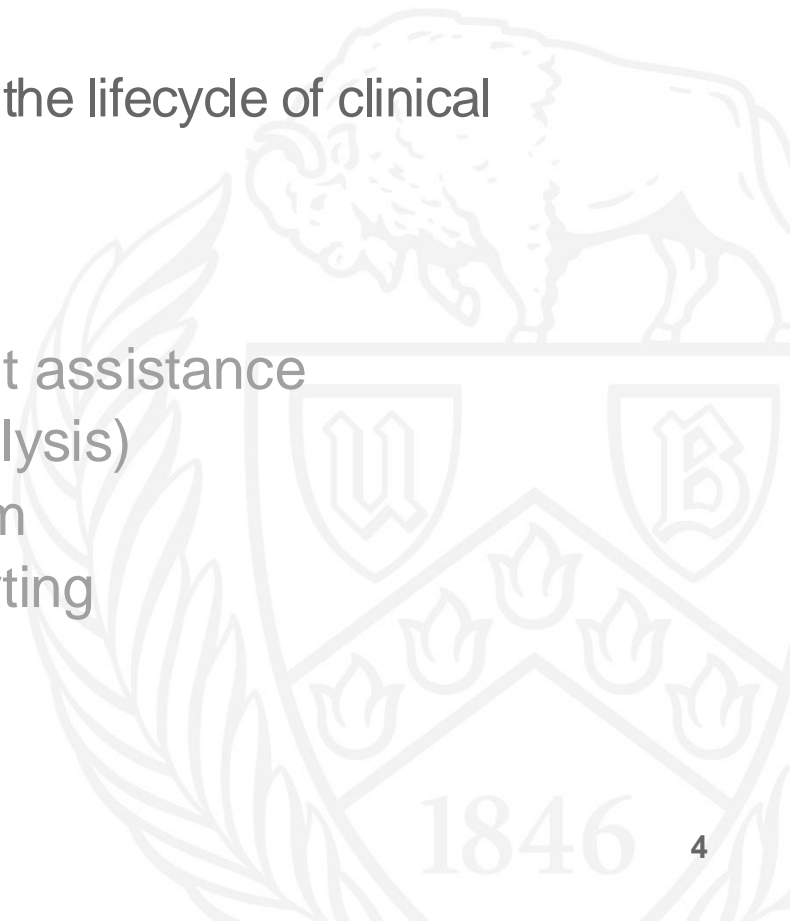

The UB Clinical Research Office (CRO) is a centralized office charged with administrative oversight for all clinical research activities of the university's faculty members.

The CRO facilitates compliant, meaningful research within the institution by unifying policies governing research conduct across all university schools and departments.

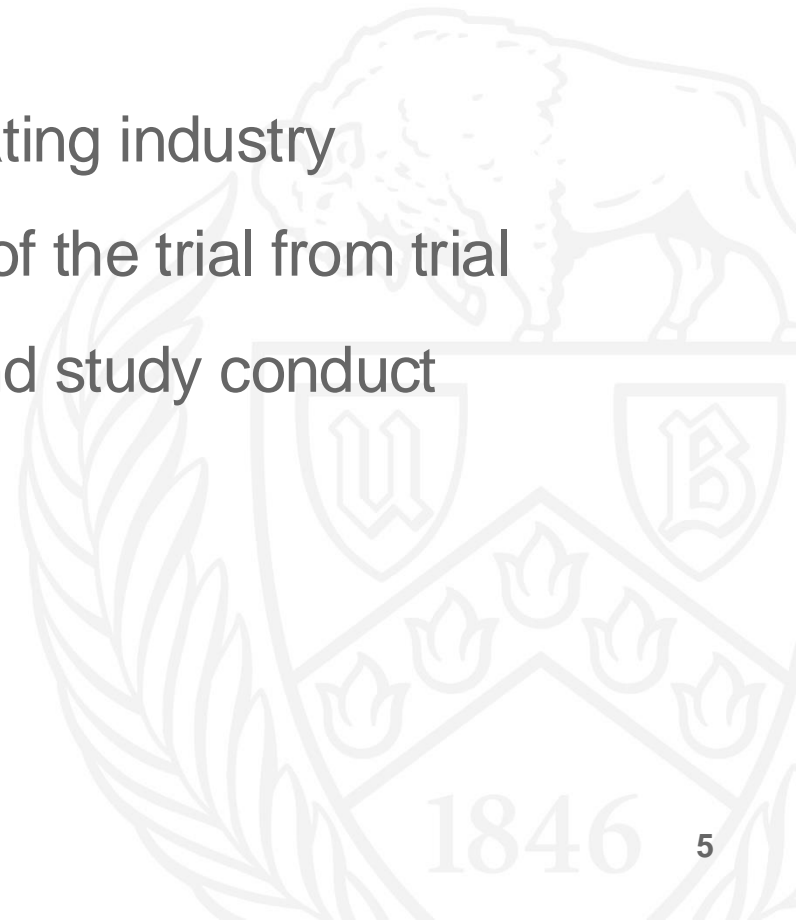

Our Functions:

- Support of the PI and study team during the lifecycle of clinical research activities through:
 - Central Study Registration
 - Protocol and budget development assistance
 - Billing compliance (coverage analysis)
 - Clinical Trial Management System
 - Financial management and reporting

Our Functions: cont

- Guidance to new investigators initiating industry sponsored studies in all aspects of the trial from trial readiness, sponsor interaction and study conduct
